

Cutout Ring Sizer Measurement Tool

The above cutout chart should help you to determine your ring size.

Print this page and cut out the ring sizer image provided here. Wrap the ring sizer around your finger with numbers facing out and then use transparent tape to fix it in place. Test the ring size by putting the paper ring sizer over the knuckle. When you have found a good fit, note the ring size number that appears at the end of the triangle.

A measurement is determined by two factors: the diameter of the finger on which the ring will be worn and the knuckle, which the ring must slip over comfortably. Generally, ring size is 4 to 13.
